- Max Speed: 25km/h

Votes: **2144**

Thank you for your vote!

Diablo

This last **Diablo** in a decade of flamboyant—some daresay outrageous—sports cars first introduced in 1990 is certainly the best Diablo.

The VT is, curiously, a very high-powered four-wheel-drive beast. Situated amidships is the biggest, baddest V-12 engine we've ever tested in a Diablo. For this 2000 model, Lamborghini has lengthened the stroke by 0.16 inch, lightened the crankshaft, used lighter and stronger titanium connecting rods, and updated the old 16-bit engine-control system to a more powerful 32-bit unit. As a result, peak engine output has been promoted to 543 horsepower at 7100 rpm, 20 more than found in the last Diablo. Torque is up 11 pound-feet to 457 at 5800 rpm.

Horsepower freaks take note: *This latest Diablo now has more horsepower than four four-cylinder Toyota Camrys.*
